PROFILE

Versatile Software Developer with **2+ years** of experience building and optimising web applications using JavaScript, TypeScript, React, Node.js, and Python (Django). Currently enhancing skills in **DevOps and application security** while pursuing a Master's in Applied Computer Science at Hochschule Schmalkalden.

EDUCATION

Masters in Applied Computer Science, Hochschule Schmalkalden 10/2025 – Present

Btech CSE, Vishwakarma University 08/2019 – 07/2023 | India

- 2.1 GPA

TECHNICAL SKILLS AND SPOKEN LANGUAGES

Languages: C++, JavaScript, TypeScript, Python, Dart Frontend: React, Next.js, Vite, Tailwind CSS, Three.js, Flutter, Swift

Backend: Node.js, Express.js, Django, Flask, FastAPI, REST API

Databases: MongoDB, MySQL, Postgresql Firebase (Firestore, Realtime DB)

DevOps & Tools: Docker, AWS, Git, GitHub, CI/CD, Linux, WebSrapcing, Authentication (JWT) , Selenium, BeautifulSoup, Problem-solving, LLM, Prompting

Spoken Languages: German(A2), English (C1)

WORK EXPERIENCE

Software Developer, KIDA Studios Pune 02/2024 – 07/2025

- Led the development and **software architecture** design of multiple full-stack applications, defining high-level system structure, API contracts, and technology stack decisions while delivering end-to-end solutions using **Django, Flutter, and Swift**.
- Collaborated as a lead with junior developers on **API integration, bug fixes, backend, database issues, production deployments, and Docker-related challenges**.
- Designed and implemented **Docker containerization** standards to **streamline** development workflows and ensure consistency across the team.
- Published applications to **AWS and the App Store**, managing **deployment pipelines and release processes**.
- Integrated **JWT authentication** in backend systems and **Firebase authentication** in mobile apps to enhance security and user management.
- Gained exposure to **cloud services (AWS)** and other services like **S3 and lamda functions**

PERSONAL PROJECTS

AutoQuote, Tech Stack: Flutter, Firebase, REST APIs, PDF Generation, Role-Based Access Control

- Built a **cross-platform application** using flutter that **automates quotation and billing** workflows for manufacturing businesses.
- Designed the **system architecture**, including **database structure, role-based access, and product inventory management**.
- Implemented **automated pricing and tax computation**, generating **customizable PDF quotations and invoices** for clients.
- Deployed in production and **actively used by 20+ manufacturing companies**, improving efficiency, **scalability**, and billing accuracy.

BudgetMate, Tech Stack: Nextjs, React, Js, Tailwindcss, Gemini AI, AWS, Flutter, Firebase.

- Developed and Deployed **BudgetMate**, an **AI-powered expense management app** that automates receipt scanning, data extraction, and financial insights using **computer vision** and **LLM-based processing**.
- Implemented an **end-to-end AI workflow** leveraging **Google Gemini API** to convert unstructured receipt images into structured JSON data for merchants, totals, and itemized transactions.
- Deployed **AWS Lambda functions** to handle **API orchestration** and ensure scalable, low-latency processing for both **mobile (Flutter)** and **web (React)** platforms.
- Utilized **Firebase Firestore** for secure, real-time data storage and synchronization, enabling seamless multi-device access and driving **60% month-over-month user growth** since launch.
- Integrated **AI-driven insights** such as price comparison across stores, spending analysis, deposit (Pfand) tracking, and personalized saving tips with measurable financial impact.
